

Lincoln Center

New tech simplifies repeat project

For the second year in a row, Taylor was asked to “skin” the outdoor stage at Lincoln Center for their *Summer for the City* festival. Banners, skirts, fence wraps and a roof 33' x 44' in size, all color printed on two sides using heavy 18 oz. vinyl.

Our new large-format RF welder was a game changer this year — turning a challenging three-week project into an uneventful three-day job.
