

Secure Packaging

Providing enhanced safety, creativity and more

The best secure packs in the industry have just gotten better. Taylor's line of secure packs for open and closed loop cards provide proven security to deter theft, along with outstanding design capabilities to appeal to consumers.

Benefits

- The inner seal is made of a specialized material that, when heated, adheres to itself and cannot be opened — even with reheating.
- The pack is even more tamper-resistant than before. Testing shows it is impossible to get into it without evidence of damage.
- The straight tear strip can be replaced with other designs, such as a zigzag, making tampering before purchase even more evident.
- The pack's external surface is made of easily printable paper to allow for more design options.
- The package can be easily die cut to further stand out on the shelf and reinforce your brand.
- Our enhanced packs retain the most important features of our previous products, making thieves even more likely to leave your cards alone.

Secure Pack Features

- Multi-panel layouts for enhanced marketing messages
- Proprietary tamper-evident slits
- Scratch-offs, security labels and protective inks
- Magnetic strip on package for swipe activation
- Giftable packaging options with specialty inks, coatings and foils
- Personalized designs and packaging, based on your needs
