

# HITRUST® Certified Print Network

Enhancing data security while reducing production costs

Cyberattacks are a constant threat to the healthcare industry, costing healthcare systems billions of dollars annually and placing patients' lives in jeopardy. To minimize this risk, it's imperative that your communications partners be as protective of your data as you are.

## Reducing Risk (And Costs) On Your Behalf

Taylor Healthcare invests in the talent, technology and controls necessary to maintain HITRUST certification at production facilities from coast to coast. This allows us to offer the best information protection assurances possible – and a number of value-added benefits.

## Why HITRUST?

Since 2007, HITRUST has been recognized as the “gold standard” of data security, privacy and compliance assessments. More than 40 authoritative sources and 2,000 available controls come together to form a certifiable framework unmatched in depth and scope. Thousands of organizations worldwide now accept – or even require – HITRUST certification of their vendor partners.

### DATA SECURITY

Minimize information risk via universally accepted privacy and security controls.

### COST SAVINGS

Save money through postage optimization and other postal logistics strategies.

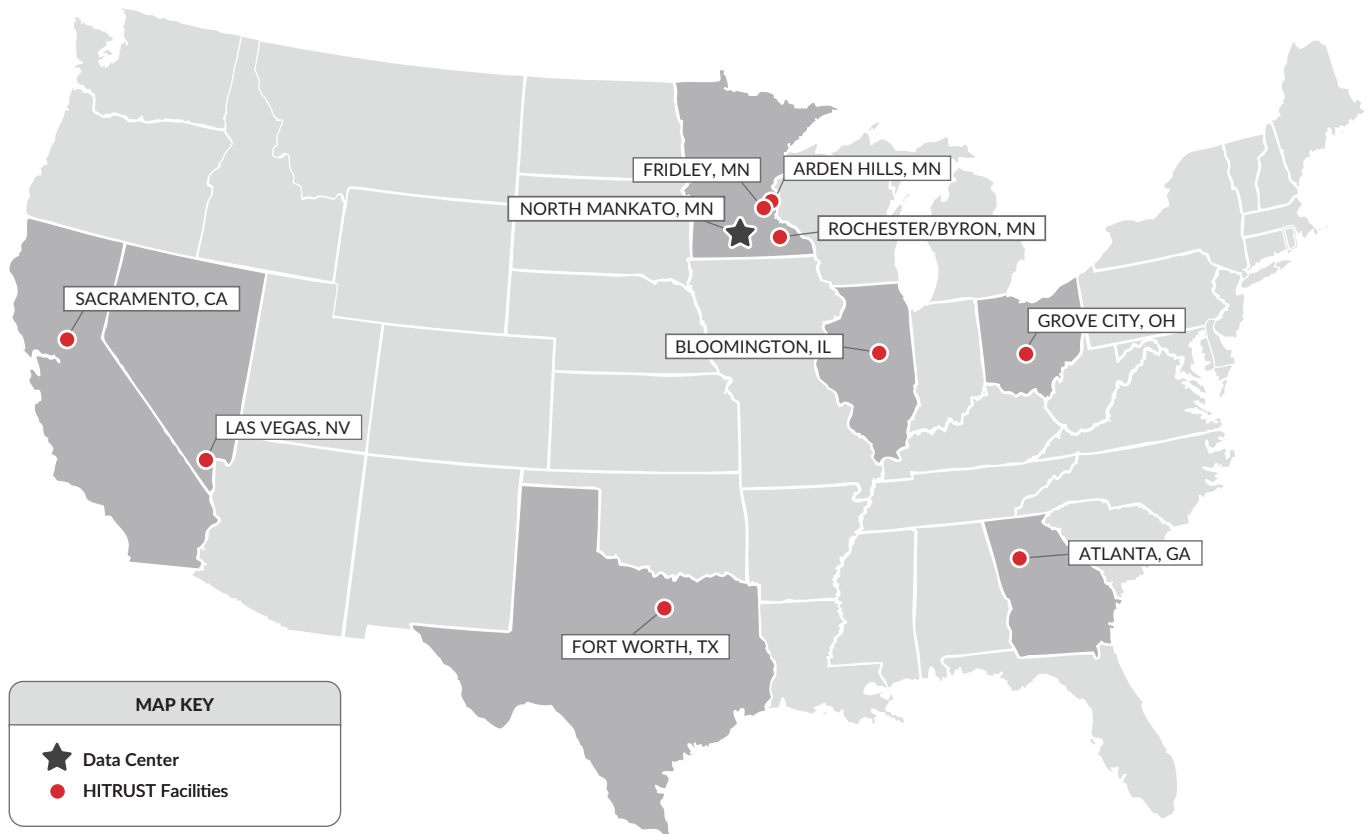

### PRODUCTION FLEXIBILITY

Enjoy the flexibility of cost-efficient long and short production runs.

### SPEED TO MARKET

Hit customer mailboxes faster thanks to our distributive print model.

## Ideal for Healthcare

Any type of customer communication that involves personal identifiable information (PII) or protected health information (PHI) benefits from the use of a HITRUST certified provider:

- Annual notices of change (ANOC)
- Explanations of benefits (EOB)
- Healthcare ID cards
- Statements, bills and letters
